

Do not manipulate, nor dismount the product while answering those questions

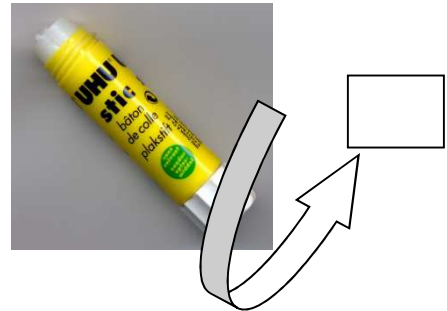

1° direction of rotation

Which seems for you the most natural way to take out the glue ? (Tick a box)

Viewed from underneath :

Clockwise

Anti-clockwise

To achieve that, does it require a left-hand thread, or a right-hand thread ?

What solution has been adopted on your component?

2° Pitch

Define the pitch of a thread.

Give two methods to measure the pitch.

What is the value of the pitch on your glue stick?

Be careful as it is a double start thread!!
